

Now accepting new clients for Social Skills Groups!

WHO WE ARE

Autism Resource Community Hub of Lehigh Valley is an inviting, user-friendly center that provides comprehensive services to individuals with autism and their families. Our professional staff are trained in Autism Spectrum Disorder (ASD) and support the success of each individual in a therapeutic learning environment.

In addition to meeting ADA standards, our state-of-the-art facility incorporates special lighting and sensory features that are designed to help each person achieve their full potential.

Medicaid and most commercial insurance plans are accepted.

SOCIAL SKILLS GROUPS

The Outpatient Program offers weekly group therapy sessions designed to improve communication skills and develop social interaction abilities. Our social skills groups also help children to increase self-regulation, strengthen listening skills, and facilitate lasting friendships among the group members.

We are pleased to announce the start of a new group for children ages 4-6, that will be held on Wednesdays at 4:00pm beginning in June. In addition, ARCH currently has group openings for children ages 5-8 that meets on Saturdays at 11:00am.
